

NANRITA.N

CLASS 8

Time to act

We all sit in cities
Packed in walls
Sitting in ACs
Roaming in malls

Living on heightened-
Artificial floors
Away from the woods
Away from the shores

And we all think
This is how we live
This how we enjoy
This is how 'to' live

Ever wondered that
Is this all free?
Or is it at a cost
That we don't see?

The receiver received
The giver remembers
Nature gave us a lot
And we exploited what's hers..

And now she is back
Asking for the cost
And we will have to pay
For what she has lost

We cut down trees
We polluted water
The oxygen depleted
And did endless slaughter

Species gone extinct
Soil gone infertile
Glaciers have melted
Several lives fragile

Birds have gone
Into endangered stages
Wildlife were killed
Or trapped in cages

Towers erected

Skyscrapers built
Industries expanded
And abstained of guilt

Justifying our greed
We continued to exploit
Now we are trapped
In dept trap tight

No way to escape
No way to repay
But there is some time
Little time to play

To play smart
To play honest
To preserve the nature
To give her some rest...

Begin it now
And we can still survive
Only then we can thrive
To preserve if we strive...
